

<New model OSC500AV Pulverizer>

2015/07/17

Japanese manufacturer OKADA has launched the new OSC pulverizer series Model OSC500AV, which is suitable for 40-100 ton class excavators.

Okada pulverizer OSC Series are now available from 280kg to 5420kg to cover 3t to 100t excavators. New Model OSC500AV has an enhanced box welded structure frame to materialize larger opening jaw and wide frame with light weight.

The okada OSC series features amazing jaw speed which is activated by ultra-high performance valve (High efficiency oil consumption specification), many self-safety devises of Emergency working mode, Safety valve and rod cover as standard and this feature has been proven globally with positive feedback from customers.

The company are now starting the delivery of okada products from Okada Europe warehouse. Okada will display another new OSC series at Bauma Munich in April 2016.
